

- **UNATTENDED REFUELLING SERIES**

- **COMPAC DCA** (DRIVEWAY CARD ACCEPTOR)

The DCA is Compac's leading, versatile, 24/7 Fuel Management System

- Ideal for Unattended Refuelling sites
- Works with all major protocols
- Accepts local account cards
- Range of authorisation options
- Offers a total wireless solution
- Connects to CompacOnline

● COMPAC DCA FEATURES

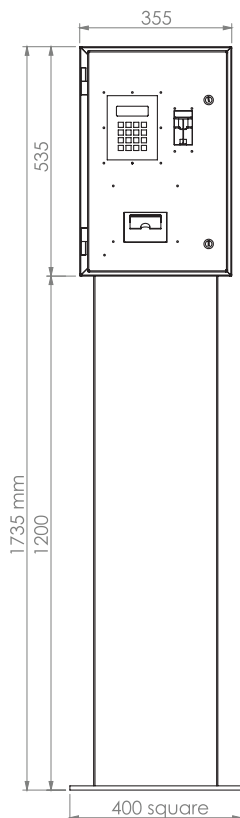

The Compac DCA is a fuel management terminal ideal for unattended refuelling and payment. It is particularly suited to sites such as airfields, marinas or after hours retail service stations.

The DCA accepts a variety of devices to authorise fuel deliveries for approved users. Using different authorisation methods, user identification at the DCA can be configured to match with the driver or vehicle. In addition, odometer readings can be recorded at the time of refuelling with a PinPad prompt.

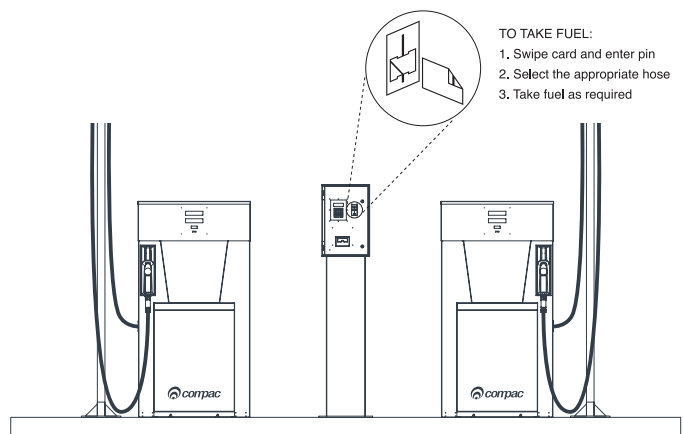

For downloading fuel delivery data from the DCA, use CompacOnline. CompacOnline allow you to remotely: manage account cards, adjust pump pricing, manage transactions and run reports.
